With Atlantic Global OnDemand, you can track timesheets, expenses and manage your project & resource schedules in a highly intuitive web-based system that can be accessed anywhere, anytime and is full of powerful features designed to help you run your business better.

Atlantic Global OnDemand

A Fresh Approach to Business Software

■ Timesheet & Expense Management ■

Our highly intuitive OnDemand software allows you to enter, track, recharge and report time and expense information quickly and efficiently, giving you accurate real-time data on employee productivity and utilisation.

Features

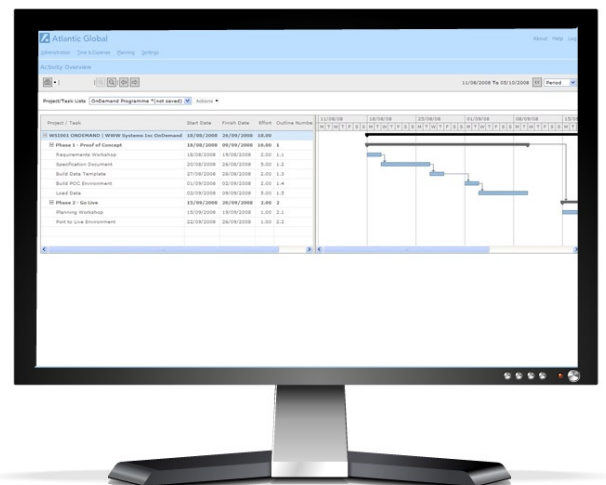

- Capture all chargeable & non-chargeable time
- Multiple entry views including classic entry and direct entry
- Create timesheets directly from your resource schedules
- Track key performance indicators including working time, standard, chargeable and productive utilisation.
- Easy expense claim creation & submission process
- Full multi-currency and multi-lingual capabilities

■ Project Planning ■

Atlantic Global OnDemand adds discipline to the project planning process by providing users with a consistent method of planning projects and distributing plans. Centrally held data provides a powerful capability to distribute project visibility throughout your organisation ensuring project managers and executives can quickly and efficiently access real-time information on project progress and performance.

Features

- Plan at any level of the 10-tier project hierarchy
- Single view of project activity and dependencies
- Track actuals against tasks or assignments
- Full project review at task and assignment level

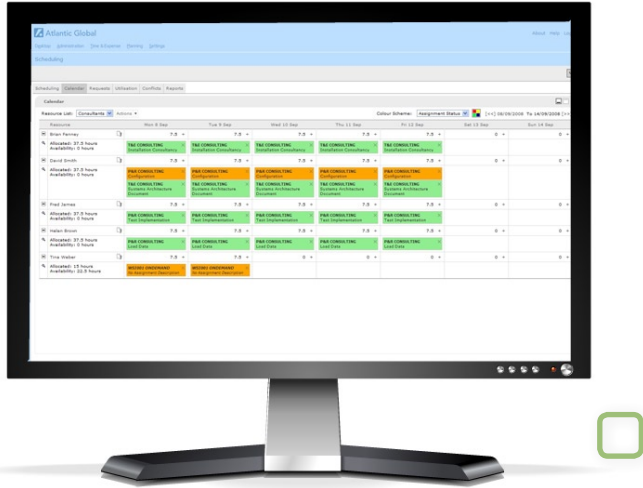

Atlantic Global OnDemand

A Fresh Approach to Business Software

■ Resource Scheduling ■

Managing your people has never been easier with Atlantic Global OnDemand. The solution provides instant visibility of your global resource pool, enabling you to quickly and easily locate and deploy available best-fit resources to your projects depending upon role, skill, experience and availability.

Features

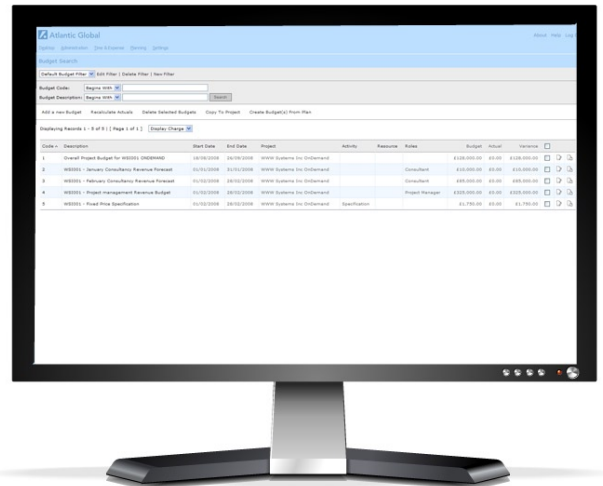

- Easily track and manage role-based resource requests
- Daily, weekly, monthly, team and Gantt based scheduling views
- Analyse planned resource utilisation and capability
- Locate and deploy available, qualified, best-fit resources
- Identify resource shortfalls and utilise under-allocated resources

■ Project Costing ■

Atlantic Global OnDemand provides a comprehensive tool for planning and tracking all of your project and service related costs. Projects are managed professionally, by providing users with an effective tool for tracking project progress, forecasting future cost and revenue, as well as maintaining real-time control over project budgets.

Features

- Accurately budget across clients, projects, activities, roles, resources, cost and charge
- Forecast future cost, revenue and margin
- Set budgets across organisational units and project levels
- Estimate the time and materials required to deliver projects from project plans, project templates or from scratch

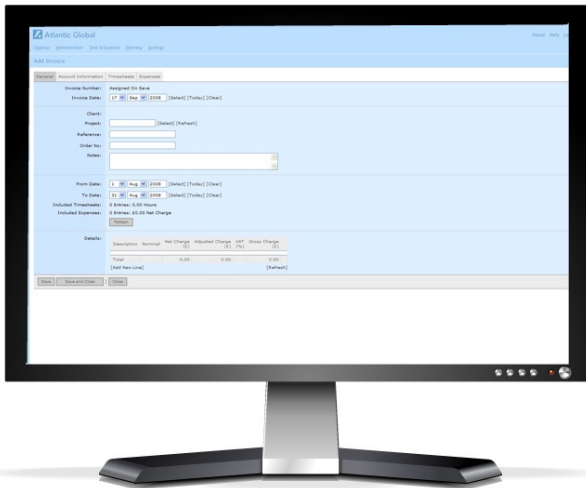

Atlantic Global OnDemand

A Fresh Approach to Business Software

■ Client Billing ■

Having an effective time and billing system is an essential part of successfully running a service business. Atlantic Global OnDemand helps your business become more efficient through automating the time billing process enabling you to reduce billing cycles and improve cash flow.

Features

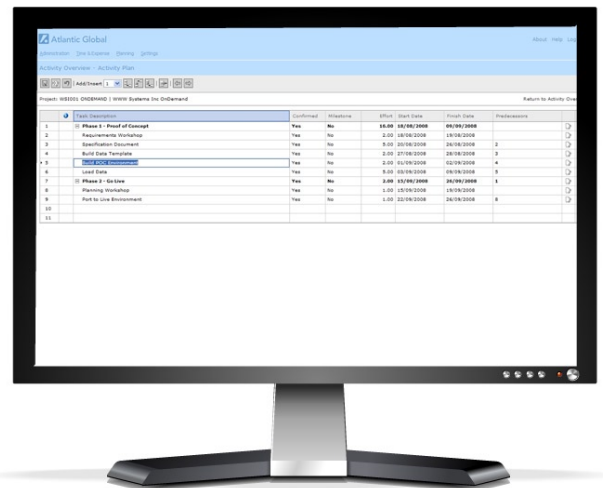

- Easy identification of all billable time & expenses
- Create invoices with a single click
- Manage multiple billing types including time & materials billing, fixed price billing schedules and advanced billing

■ Comprehensive Reporting ■

Atlantic Global OnDemand includes a comprehensive set of standard reports focused on Time & Expense Management, Project Costing, Project Planning, Resource Scheduling, Client Billing, Exceptions and Status reports.

Features

- Add reports to dashboards to ensure users can carry out all of their reporting from a single location
- Group reports to ensure restricted access by login.
- Build ad hoc reports with the inbuilt custom report writing tool
- Load context sensitive reports against any view in the system with single click access
- Print, export or load reports into Excel directly from the system

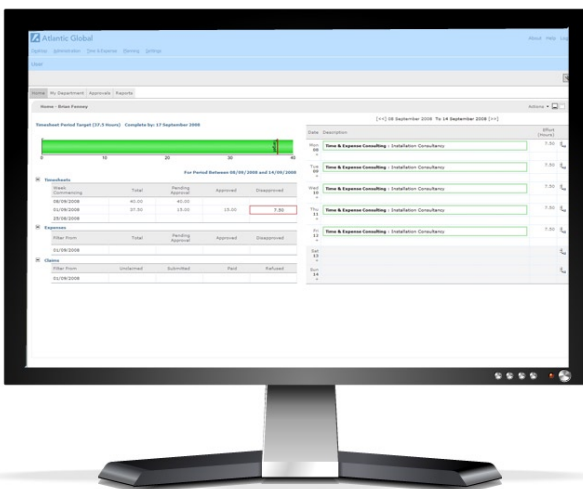

■ Intuitive Dashboard Driven Solution ■

Atlantic Global OnDemand role-based dashboards give each user their own view of the organisation. The user dashboard provides users with complete focus on their daily workload, including identifying their work schedule, updating their time and expenses and keeping up to date with their to do actions.

Features

- Alerts & Statistics provide a detailed status breakdown of timesheets and expenses including:
 - * System notifications and messages
 - * Completion status thermometer
 - * Timesheet & Expense RAG status
 - * KPI analysis and forecasted utilisation.
- The schedule view includes 5 interchangeable modes to allow the user to view meetings, assignments and to do actions in a weekly or monthly calendar view; through individual and team Gantt based schedule views; and a team based wall chart view.
- Approvals allow permitted users to see their team's timesheets, expense and claim status, compliance and RAG status. This interactive dashboard allows users to drill through to investigate issues, approve multiple timesheets and expenses in a single click and to escalate missing and incomplete timesheets via system messages

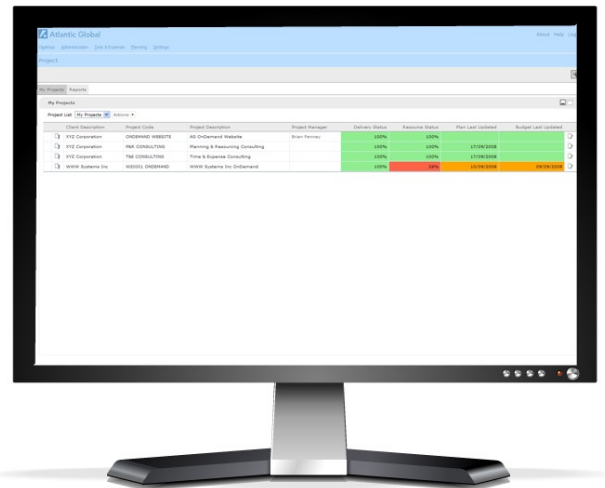

■ Project Dashboard ■

The project dashboard puts all of your project data at the fingertips of your project and account managers. Users can easily understand the RAG status of projects, analyse financial and delivery progress, view resourcing status and quickly and easily approve project-based time

Features

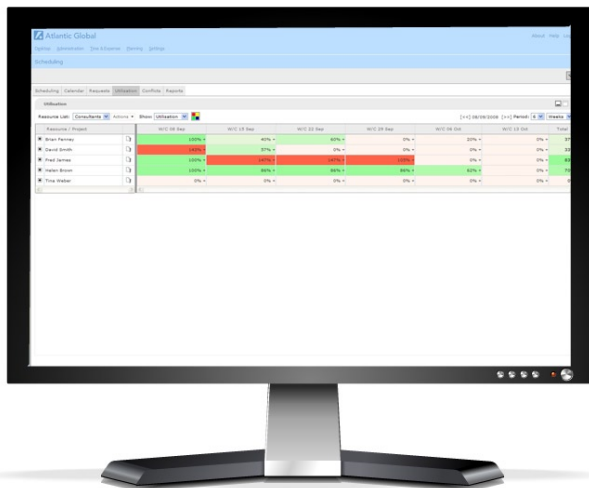

- Instantly analyse the status of your project portfolio and drill down into detailed project information, RAG status and issues.
- View your task schedule at any level in the project hierarchy, identifying task dependencies and subtasks.
- Effortlessly create task based plans from project templates or using our highly intuitive Quick Edit view.
- Analyse project financials based on planned vs. actuals or budget performance.
- Dynamically produce financial graphs based on time, cost, date range, roles and projects
- Gain an instant overview of resource usage on your projects. Identify outstanding resource requests, shortfalls, over allocations, resource conflicts and under-allocated tasks.
- Easily analyse project specific timesheets and expenses awaiting approval. Unique traffic light system highlights on target, missing, incomplete, over allocated and escalated time & expenses

■ Resource Dashboard ■

The resource dashboard provides your resource managers with an accurate picture of resource usage across the organisation from monthly utilisation down to daily assignments ensuring you maximise the productivity of your best asset, your people.

Features

- Gain an instant picture of resource utilisation and capability across your team
- Easily fulfil Resource requests and identify resourcing conflicts and under allocated tasks
- Identify resource shortfalls and training requirements

■ Implementation Process ■

Atlantic Global OnDemand is extremely easy to deploy. The entire infrastructure is provided meaning you only need to focus on configuring the application. Our quick start process is there to make this as easy and seamless as possible.

Quick Start Process

- Sign up for your 30 Day Trial
- Discuss your requirements with your dedicated solution expert
- Complete the data template provided
- The Atlantic Global solution expert will then load your Data and provide 2 hours free phone coaching on how to use your configured system

■ Phone Coaching ■

Additional phone coaching can be purchased on an hourly basis. Phone coaching provides an additional advantage over conventional training by allowing Atlantic Global to take control of your actual solution and guide you through how to use and configure the system. To keep costs low, your solution expert will discuss your exact training requirements before each coaching session to ensure your session is focused and you receive maximum value.

■ Professional Services ■

For larger implementations Atlantic Global offers a series of professional services to help you define your requirements, plan your implementation, roll out Atlantic Global OnDemand and ensure user buy in.

Services Include

- Business Analysis
- Project Management
- Implementation Consultancy
- Training
- Support
